BREVE DESCRIPCIÓN DE CONTENIDOS (SEGÚN LA MEMORIA DE VERIFICACIÓN DEL TÍTULO)

THEORETICAL

The Master's Thesis allows students to activate the knowledge and skills acquired during the teaching period of the Master through academic research for their future incorporation to doctoral programs, where research autonomy and independence are crucial. The elaboration of the Master's Thesis requires the autonomous work of the student, who will have the guidance, supervision and help of a professor expert in each specific research line. The students' research work will be based on the search, reading, consideration, study and analysis of both primary and secondary sources; the organization of the selected material; the writing of the work with clarity and correction; and the consultation of possible doubts with their supervisors. The completion of the master's thesis presupposes that the student has the critical maturity and sufficient work autonomy to successfully complete a research project that requires proper planning and use of time, as well as the proper use of analytical tools.

PRACTICAL

Regardless of the chosen topic, the thesis should adjust its contents to the following structure:

1. Abstract
2. Definition, justification and relevance of the topic within English Studies.
3. Brief description of previous studies in this field.
4. Hypotheses and work objectives.
5. Methodology used to address the object of study.
6. Description of the corpus used (if applicable).
7. Conclusions

8. List of works cited
